**NOISE COMPLIANCE MONITORING March 2020**

**Report received:** 11<sup>th</sup> September 2020

**Attended monitoring:** 2<sup>nd</sup> – 4<sup>th</sup> September 2020

**Licence Condition L2.1**

Noise generated from the premises must not exceed the noise limits in the table below.

Locality and Location	Day LAeq (15 min)	Evening LAeq (15 min)	Night LAeq (15 min)	Night LA1 (1 min)
Location 1: Nearest affected residence known as "Rosebank" located at Lot 22 in DP.733610 on Wallamore Road, Tamworth	38	37	35	45
Location 2: Any other affected residence	38	37	35	45

*Site Plan*

**Licence Condition M4.1**

Compliance outlined above

**DISCUSSION AND CONCLUSION**

Results of our attended noise surveys confirm that noise emissions from the Tangaratta site are compliant with the criteria during all time periods at the Rosebank residence.

It should be acknowledged that the 3 month night truck trial at the Tangaratta feedmill had ceased prior to our September surveys.

Only estimates of noise contributions from the Tangaratta site were possible during the day, as noise emissions from the Tangaratta site were only audible on occasion, due to the exceptionally high level of noise emanating from the mill on the Rosebank property. In saying this, our observations and subjective assessment do confirm that the Tangaratta plant was operating below the criteria during the day.
