NOISE COMPLIANCE MONITORING March 2023

Report received: 9th April 2023

Attended monitoring: 28th February – 2nd March 2023

Licence Condition L2.1

Noise generated from the premises must not exceed the noise limits in the table below.

Locality and Location	Day LAeq (15 min)	Evening LAeq (15 min)	Night LAeq (15 min)	Night LA1 (1 min)
Location 1: Nearest affected residence known as "Rosebank" located at Lot 22 in DP.733610 on Wallamore Road, Tamworth	38	37	35	45
Location 2: Any other affected residence	38	37	35	45

Site Plan

Licence Condition M4.1

Compliance outlined above

DISCUSSION AND CONCLUSION

Results of our attended noise surveys confirm that noise emissions from the Tangaratta site are compliant with the criteria during the day and evening at the Rosebank residence. It was noted that exceedances of 1-3dB(A) occurred at night. Observations revealed that grain in bins, conveyors were responsible for the exceedances. We understand that action has been taken to eliminate future exceedances from these noise sources. In saying this, the existing Leq noise levels from extraneous noise sources are higher than those recorded from the Tangaratta site, and it is unlikely that residents would be disturbed by the minor isolated exceedances.

Only estimates of noise contributions from the Tangaratta site were possible during the day, as noise emissions from the Tangaratta site were only audible on occasion, due to the high levels

of noise emanating from the Rosebank mill, birds and passing vehicles, etc. In saying this, our observations and subjective assessment do confirm that the Tangaratta plant was operating below the criteria during the day.
